Arabic

English

French

## About Me

As a web development bootcamp student, I have gained valuable skills and a passion for creating user-friendly websites. Previously, I worked as a cashier in a clinic, where I developed strong managerial skills that thrived in a fast-paced environment. My job consisted of using a computer which sharpened my computer skills and made me more familiar with screens and technology. One of the main requirements of this job is to talk with costumers, listen to them and try to find a solution to their problems. Therefore I gained strong social skills that made me capable of working well with any team and be flexible with the tasks given to me. With a commitment to learning and a blend of customer service and technical expertise, I'm eager to contribute to collaborative web development projects.

## Experience

October 2023- Present  
Coding Dojo Africa

### Web Development Bootcamp

As a Coding Dojo web development student i am mastering diverse programming languages and frameworks such as Python, React and Java. Equipped with hands-on experience in building practical web solutions, I've honed problem-solving skills and am well-prepared for a career as a proficient web developer.
